

- 1 Work out the value of $\frac{11+4 \times 7}{3}$.

$$\begin{aligned}\frac{11+4 \times 7}{3} &= \frac{11+28}{3} \\ &= \frac{39}{3} \\ &= 13\end{aligned}$$

Answer 13 [1]

- 2 A train leaves Paris at 10 56 and arrives in Marseille at 13 12.

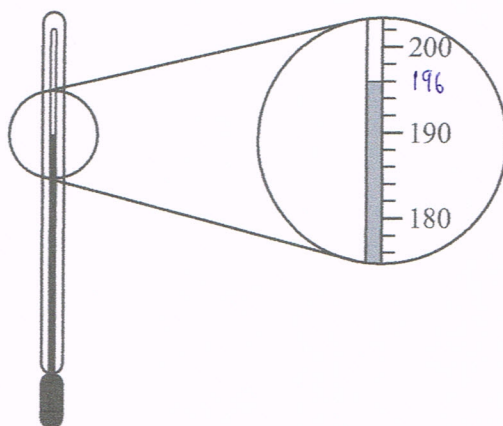

How long does the journey take?

Give your answer in hours and minutes.

$$\begin{array}{r} 13.12 \rightarrow 12.72 \\ 10.56 - \quad 10.56 - \\ \hline \quad \quad 02.16 \\ \quad = 2 \text{ h } 16 \text{ min} \end{array}$$

Answer 2 h 16 min [1]

- 3

The diagram above shows part of a thermometer which measures the temperature in °C inside an oven.

What is the temperature in the oven?

Answer 196 °C [1]
